

## Farmer Led Research

The Farm PEP evolves knowledge sharing around farmer led research projects

# Featured Projects

# YEN Nutrition YEN Nutrition

Coordinator: Roger Sylvester-Bradley, ADAS Funder: Member funded

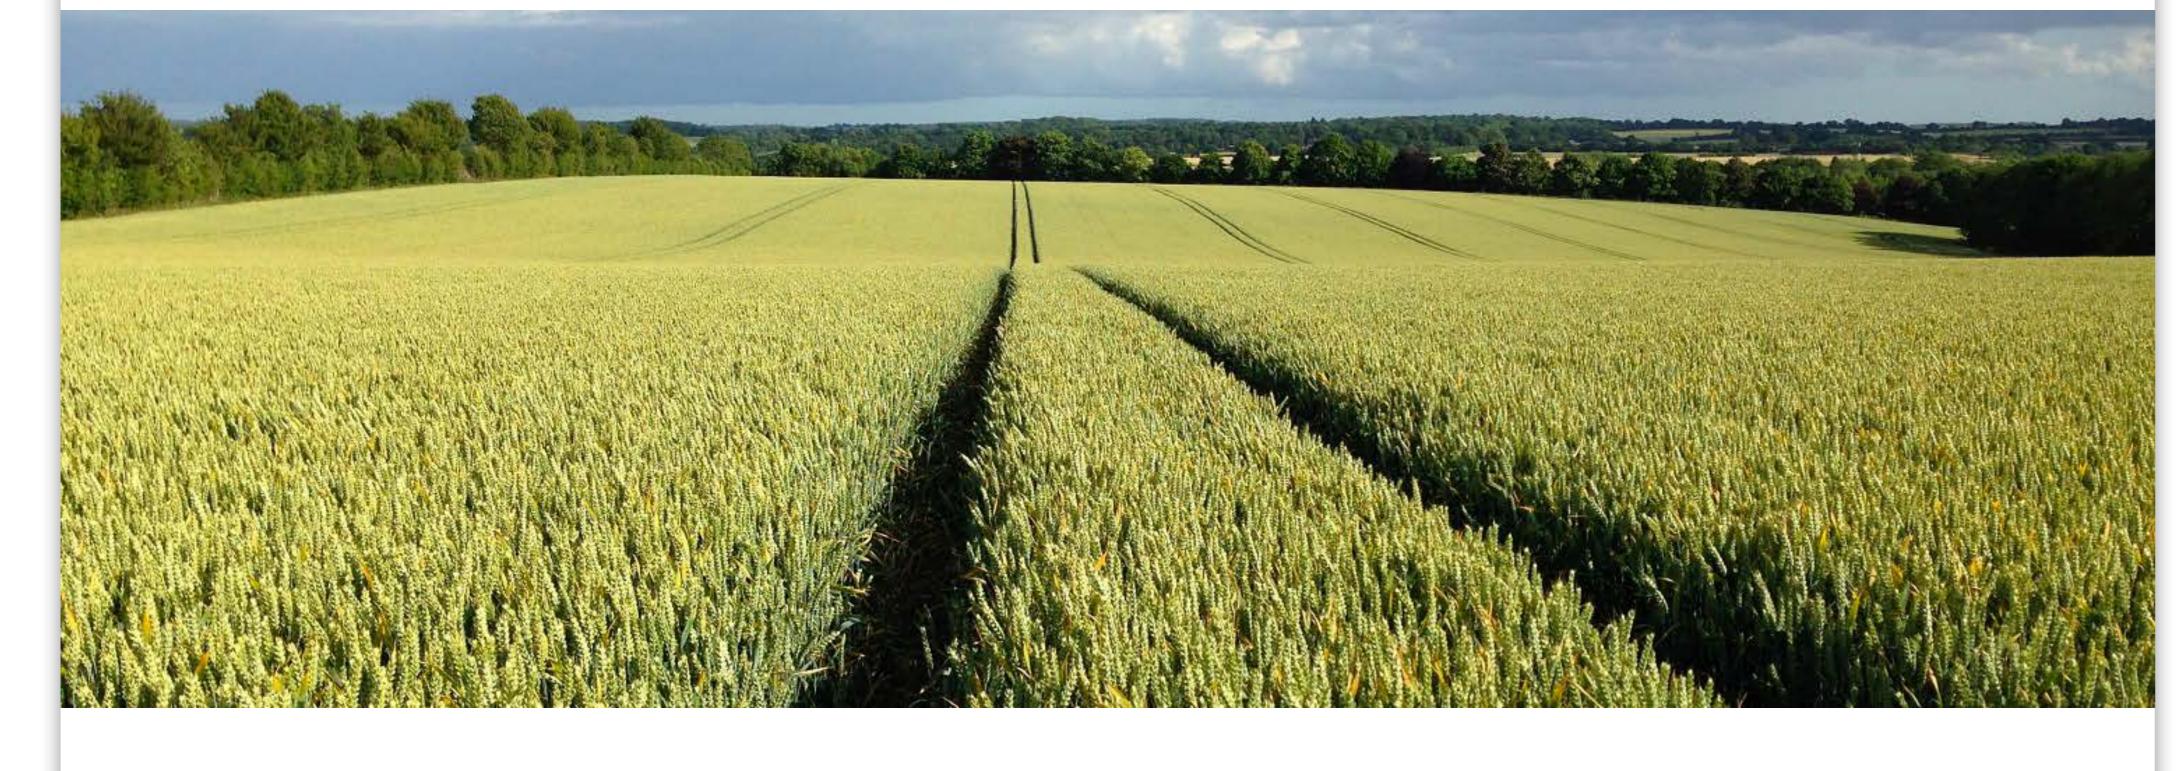

Status: Active - accepting applicants

YEN Nutrition is an independent network connecting anyone seeking to improve the nutrition of arable crops. YEN Nutrition membership begins with grain analysis which then enables independent and complete nutrition benchmarking of six or more fields.

### Farm Innovation Groups

Coordinator: Sarah Kendall, ADAS

Funder: EIP Agri

Status: Active - accepting applicants

Farm Innovation Groups – or FIGs and comprised of participants who are interested in testing a particular hypothesis for increasing their yields. These can now be used to facilitate further 'action research' projects under real-life farming conditions.

#### The Nutrients Conference

Event

By: Roger Sylvester-Bradley, ADAS
Date: 2 days ago
In: YEN Nutrition

Surely it's a no-brainer that "To manage nutrition, so we must measure nutrients." If you're interested in which nutrients matter most to crops and yields and healthy foods you might enjoy The Nurtrients Conference which is being held at Norfolk show ground on the 23 August...

# Reducing run off?

Question

By: Joe Bloggs, A Farm
Date: 3 days ago
In: Run Off

Too much fertilizer can actually kill the plant and excess fertilizer can runoff into streams and lakes causing toxic algal blooms that are harmful to aquatic life and even people and their pets. But what can we do about it?

## Farm carbon calculator

Resource

By: Christina Baxter, ADAS
Date: 4 days ago
In: YEN Zero

This PDF provides details on how to calculate a very simple carbon footprint for your farm or crop.

Christina Baxter,

# YEN Zero

YEN Zero connects people from across the agricultural industry to meet the industry's target of achieving net zero emissions by 2040. YEN Zero is a space to share knowledge, examine metrics for calculating cropping carbon footprints to create consensus across the industry, and test mitigation strategies on farm to establish 'what works'.

No till as a technique to reduce farm carbon emimssions

Idea

A Farmer, A Farm Date: 8 days ago

What if we could use no till techniques to explore methods for growing crops or pasture without disturbing the soil through tillage? No-till farming decreases the amount of soil erosion tillage causes in certain soils, especially in sandy and dry soils on sloping terrain.
